

# Ankle X-Ray Report

Patient Name:	Noor Hamadi
Patient ID:	2
Test Name:	Ankle X-Ray
Test Date:	2025-04-12

## Radiology Findings

The ankle X-ray reveals mild soft tissue swelling with no visible fracture lines. Bone alignment appears normal. No signs of dislocation or abnormal bone density patterns. Joint spaces are well maintained.

## Doctor Notes

Patient advised to rest for 5–7 days. Use ice compression twice daily. Avoid strenuous activity until swelling subsides. Follow-up recommended if pain persists.
